B.S. in Software Engineering, summa cum laude — 3.97 GPA. I'm a software engineer with a track record of translating complex technical solutions into measurable, value-driven outcomes. As a U.S. Marine Corps veteran, I bring disciplined execution, sharp communication, and a mission-focused approach to every problem I take on. My background spans engineering, analytics, and customer-facing work, which gives me a natural ability to earn client trust, understand what they actually need, and build solutions that drive lasting performance and efficiency

Employment history

Retail Operations & Inventory Analyst Panama Homes LLC

Jan 2023 - Current

Hialeah, FL (Westland mall)

- Managed end-to-end inventory operations for a multi-category toy retail business, sourcing and coordinating with international distributors across 4 countries to maintain optimal stock levels for ages 0–18 product lines.
- Built and maintained tracking systems for inbound shipments and warehouse storage, improving receiving accuracy and reducing time from shipment intake to point-of-sale readiness.
- Developed Excel/Google Sheets models using formulas and pivot tables to track 25+ SKUs across inventory levels, reorder points, and sales trends, enabling data-driven purchasing decisions and reducing stockouts/overstock.
- Directed social media and digital advertising strategy to drive foot traffic and brand awareness, contributing to measurable growth in kiosk sales over [timeframe].
- Ensured full regulatory compliance by managing business licenses and permits, and partnered with a CPA to prepare and file accurate annual tax returns.

Export Operations Analyst Safe Passage Partners, LLC

Oct 2023 – Jan 2026

Pembroke Pines, FL

- Coordinated end-to-end export logistics from the U.S. to Ecuador, evaluating shipping platforms and carriers to optimize for cost, transit time, and reliability.
- Managed the full shipment lifecycle, from goods acquisition and travel/lodging arrangements to weight and compliance verification against airline cargo policies. Ensuring on-time, policy-compliant deliveries for 7+ shipments monthly.
- Built Excel/Google Sheets tracking systems with formulas and pivot tables to reconcile client payments, monitor shipment weight/cost thresholds, and generate summary reports for financial reporting.
- Handled final-mile delivery coordination in Ecuador, resolving logistical issues in real time to prevent delays or losses.

Sales Channel Developer & IT Optimization Specialist, Cordaroy's

May 2020 - May 2024

Gainesville, FL

- Boosted revenue by 32% through tech-driven sales channel enhancements, aligning platform improvements with business growth targets.
- Hand-coded and maintained e-commerce site improvements using HTML, CSS, and JavaScript, redesigning key UX/UI elements to improve customer satisfaction and drive conversion rates.
- Created and documented SOPs alongside inline code documentation to ensure system stability, maintainability, and smooth handoffs across the team.
- Optimized site performance and page layouts, resulting in measurably higher user engagement and checkout conversion.
- Conducted market and competitor analysis to inform sales channel strategy and drive customer acquisition growth.

Gunnery Sargent Ortiz. USMC
(904)662-3842

Sales and Customer Relations, Cordaroy's Gainesville, FL

Sep 2019 - May 2024

- Managed all inbound customer communications across phone, email, and in-person channels, resolving order issues and product inquiries to ensure a seamless experience from first contact through purchase.
- Delivered live showroom demonstrations of Cordaroy's convertible furniture line, using hands-on, consultative selling to convert product interest into completed sales.
- Held full accountability for daily store operations as keyholder, including opening/closing procedures, register management, and cash handling for the Gainesville location.
- Served as primary point of contact for customer-facing escalations and order resolution, maintaining professionalism and responsiveness to protect brand reputation and customer retention.

Platoon Sargent, USMC

Jul 2016 - Jul 2024

- Led Marine platoons in high-pressure settings, achieving mission objectives and enhancing resilience.
- Awarded the Robert Mett Medal for leadership during Northern Strike, a major military readiness event.
- Trained at Quantico as a Marksmanship Coach, enhancing rifle combat skills for annual training.
- Improved unit readiness through joint and multinational training across all warfare domains.
- Fostered a collaborative environment, resulting in measurable improvements in team performance.
- Coordinated training exercises to enhance combat readiness, resulting in marked improvements in unit performance and efficiency.

Area Sales Lead, Premier Global

Aug 2014 - Jun 2016

Central Florida (Sam's Club Locations)

- Ranked as the top DirectTV sales performer in the area, averaging 15 new customers per week.
- Turned around a low-performing location by improving customer engagement, sales strategy execution, and team coordination.
- Drove wireless sales growth by averaging 7 new phone activations weekly across major carriers.
- Led weekly sales meetings to reinforce strategy, motivate the team, and improve closing consistency.
- Excelled in closing high-ticket sales, upselling accessories and bundles, and overcoming customer objections.
- Built strong repeat-customer relationships through trust, product knowledge, and personalized service.

Legal Assistant, Jose Moreno, PA

Aug 2013 - Jul 2014

Gainesville, FL

- Conducted legal research, enhancing case preparation efficiency and outcomes.
- Assisted in documentation, streamlining workflow and boosting productivity.
- Supported attorneys with research, improving overall team efficiency.
- Refined legal processes, contributing to successful case results.

Education

Keiser University, Melbourne, FL

Jan 2024 - Mar 2026

Bachelor of Science in Software Engineering

Graduated with a 3.97 GPA, demonstrating academic excellence in Computer Science and advanced Software Engineering coursework

Specialized in multi-platform development across desktop, mobile, and web environments, applying full SDLC methodologies from requirements analysis to deployment

Designed scalable software architectures and intuitive user interfaces, optimizing for performance, accessibility, and user experience

Applied formal methods and computational theory to analyze and engineer complex systems, gaining proficiency in OOP and multiple programming languages

Internships

Backend Developer Intern Jan 2025 - Apr 2025
BlaiseTransit

Remote (Canada-Based)

- Engineered backend features for a real-time, on-demand transit platform using JavaScript, Node.js, and MySQL, contributing to scalable transportation solutions with social impact
- Collaborated asynchronously with a distributed team across time zones, using Slack, GitHub, and Jira to manage tasks and code reviews
- Participated in Agile development cycles, contributing to sprint planning, stand-ups, and iterative feature delivery in a fast-paced startup environment
- Designed and optimized RESTful APIs to support dynamic routing and real-time data exchange between mobile and web clients
- Troubleshoot and resolved backend issues, improving system reliability and user experience for live deployments
- Documented backend workflows and architectural decisions to support remote onboarding and team knowledge sharing
